Longer Product Life

SERVICE CHECKLIST

Dye Test Toilets to identify leaks that could be costing you hundreds of dollars per year in wasted water.

Check Faucet and Sinks For Leaks . Tighten all loose faucet handles packing nuts or stems during inspections (Repairs requiring parts will be at an additional cost)

Clean all Aerators verify steady water flow. If replacement is necessary there will be an additional charge.

Inspect visible piping for leaks and corrosion to identify potential leaks before they occur.

Check emergency shut-off valve operation to ensure the valves will be available when needed.

Tag Emergency Shut-Off Valves so you can easily identify the proper valves during a water crisis.

Check Washing Machine Hoses for material flexibility and integrity, to identify the potential for hose rupture from deterioration.. If needed replace hoses with new standard rubber hot and cold hose lines. The #1 insurance claim is washing machine hoses bursting.

***** (Retail Value Savings \$140.00)*****

Inspect Anode Rod preventative maintenance can extend the life of a typical water heater. Contingent that the rod can be manually removed.

Inspect Flue Pipe check flue pipes for corrosion and that the pipe has the correct grade.

Water Heater Flush all manufactures recommend having this service performed in order to maintain the warranty . It removes sediment build up from

your water system, extends the life of the water heater and improves the units recovery and performance.

***** (Retail Value Savings \$165.00)*****

Check For Leaks testing for leaks is extremely important. If leaks are found early, appropriate actions can be taken to remedy serious, costly future problems.

Check For Gas Leak visibly check the gas line from the water heater shut off valve to the burners. Undetected gas leaks are dangerous.

Check Backflow & PVB Condition to ensure they are in good working condition.

Check Bath and Shower Caulking If necessary caulk around bathroom fixtures only (does not include tub and shower wall) & make recommendations on any other areas where needed.

Check Garbage Disposal for proper operation

Check Water Pressure verify that your home has 55-70PSI to maintain warranty specifications and avoid "noisy" pipes.

Check water condition . If there is an existing water treatment system ensure it is working properly.

All Drains will be checked if drains are not "running freely" they are likely to become backed up very soon. (Cabling the line will be at an additional cost)

Camera Sewer Line with assessable cleanout camera main sewer line only. Verify the condition of the line to be free of roots, grading issues, and breaks.

***** (Retail Value Savings \$250.00)*****

No. Systems: _____

Confirmation Date: ____/____/____

Disclaimer: This service agreement is a binding contract between the authorized signor and Atlas Plumbing. One annual inspection and service will be provided as described above. The discounts and benefits defined will be good until this agreement is terminated. This agreement is NOT transferable. Atlas Plumbing will provide a thorough estimate of all plumbing issues found during the annual Inspection that should be addressed but that are outside the scope of this agreement. Signor understands that if additional repairs are authorized while providing the annual home service inspection, parts and labor would be at an additional cost. Client understands that the agreement is for a minimum of 12 months from the date of this agreement. The monthly payments will continue to renew after the Initial 12 months period until a written termination letter is submitted to cancel this agreement.
